

Safety Made Simple

CARBON MONOXIDE SAFETY TIPS

Carbon monoxide (CO) is the leading cause of accidental poisoning deaths in America. According to the Centers for Disease Control and Prevention (CDC), CO poisoning causes more than 500 deaths and 20,000 emergency department visits in the U.S. annually.

The use of carbon monoxide alarms could potentially prevent many of these deaths. Learn how to prevent CO poisoning in your family and how to spot the symptoms before tragedy occurs.

The only safe way to know if there is CO in your home is to arm your family with the appropriate CO alarm.
